

Cashew processing unit

About cashew processing: Cashews can be processed to make Cashew kernels and Cashew-nut shell liquid Feni [An alcoholic beverage made from cashew apple].

About the opportunity:

India exported more than 1 lakh 14 thousand metric tones for value of Rs 5000 crores in the year 2014-15. Currently India produces around 10 lakh MTs which is just sufficient for half of world's demand. As per ***Directorate of Cashew Research*** Karnataka, India has potential to grow more than 20 lakh tones of cashew. The 'vision 2020' set by the Cashew board to achieve the above goal. Research is going on in India to make Cashew Apple based processed food.

This report will be useful to anyone who is contemplating to set up a processing unit and is interested in getting real time information of set up cost, legal requirements, and break even time.

Report coverage:

1. Processing steps. (Detailed steps required in processing, machinery required with capacity, etc.)
2. Contact details of various suppliers (machinery, raw material etc), trade associations, legal consultancies etc.
3. Legal & regulatory requirements (including regulatory fee and contact details of consultancy)
4. Export market- key destinations, export process
5. Schemes (Central and State governments, also for exporters)
6. Break-even analysis
7. Profitability (Profit per unit)
8. Cost/capital needed (CAPEX)
