

Neem Oil

About the opportunity

Demand for neem oil is expected to grow rapidly due to recent government directive that has made it mandatory for urea manufacturers to coat urea with neem. Further, Neem with its insecticidal properties is a very popular herbal/organic pesticide both in India and abroad. Neem can also be used to extract Azdirchtin a compound that is used in pharmaceutical industry.

Manufacturing neem oil can be an attractive opportunity for states such as Gujarat, Maharashtra, UP, Tamilnadu which have both neem plantation and fertiliser manufacturers. This business is however, working capital intensive due to the requirement to store neem seeds (Neem seeds are only available during June-August), and requires a budget of over Rs. 1 crore.

Report coverage

1. Neem oil/Azdirchtin extraction technology, quotes from machinery suppliers
2. Neem oil manufacturing process, machinery availability
3. Raw material availability, price, suppliers, quotes from suppliers
4. Markets, key potential
5. Approvals required for Indian and foreign markets
6. Capital requirements, profitability
