

## **Pineapple processing unit**

**About Pineapple Processing:** Pineapple can be processed to make products such as Pineapple juice, Pineapple jam, Pineapple squash, sliced and canned pineapple.

### **About the opportunity:**

India makes up to 7 % of the world production of Pineapple. India's total production in the year 2013-14 was more than 1.5 million metric tonnes. The domestic demand for pineapples is growing rapidly, due to increased consumption of its byproducts (Jam/jellies and canned fruit)

This report will be useful to anyone who is contemplating to set up a processing unit and is interested in getting real time information of set up cost, legal requirements, and break even time.

### **Report coverage:**

1. Pineapple based products- domestic market, key end users, trade terms
2. Pineapple products- Export market- key destination, products in demand
3. Processing steps. (Detailed steps required in processing, machinery required with capacity, etc.)
4. Contact details of various suppliers (machinery, raw material etc), quotes for machinery, raw material
5. Quality certifications for domestic and export markets
6. Export market and process
7. Schemes (Central and State governments, also for exporters)
8. Break-even analysis
9. Profitability (Profit per unit)
10. Cost/capital needed (CAPEX)
