

Tomato processing unit

About tomato processing: Tomato can be processed to make following products; Tomato puree, tomato paste, tomato ketchup/sauce, tomato juice, tomato powder.

About the opportunity:

World's current production is around 150 billion tons of which India produces 12%, second only to China which produces 25 %¹. Processed tomato items make up to only 20% of the whole raw production in the world, Pakistan is the highest importer of tomatoes from India whereas US is highest importer and consumer of processed tomatoes of the world.

Agricultural Products Export Development Association (APEDA) is working towards guidance of the traders and exporters of tomatoes in areas such as grade designation and sizing of the tomatoes as per international standards and packaging and presentation to increase the demand of Indian tomatoes/ tomato based products in the international market.

This report will be useful to anyone who is contemplating to set up a processing unit and is interested in getting real time information of manufacturing process, machinery suppliers, set up cost, legal requirements, and break even time.

Report coverage:

1. Processed tomatoes- domestic market, key consumers, trade terms
2. Processed tomatoes- export market, key consumers, trade terms
3. Processing steps- machinery and infrastructure needed, machinery suppliers in your location
4. Export process, quality guidelines
5. Schemes (Central and State governments, also for exporters)
6. Break-even analysis, Profitability (Profit per unit)
7. Cost/capital needed (CAPEX)
