

BANANA FIBER BASED PRODUCTS

About Banana Fiber:

Banana Fiber is extracted from banana stem, which is typically thrown away after the crop has been harvested. The fiber is used in making a number of products such as handmade paper, Handicrafts, Ropes, Mats, Bags, Footwear, Threads and Twines. This banana Fiber can also be used in making paper from pulp and as a Blending material in Textile industry.

Budget:

1. Most of the products that can be made from banana fiber are handmade. To start manufacturing such products, the budget may not exceed Rs. 10 Lakhs including fiber extraction machine, manpower, house rent.
2. Handmade paper can be made from banana pulp which comes after boiling the banana stem. This whole process needs water, slate and manpower. To start manufacturing handmade paper one needs to put a capital of Rs. 20 Lakhs initially.

How Can We Help You?

We can help you understand the viability of manufacturing a banana fiber based product. We will advise you on the following

- Machinery: Quotes for machinery for paper manufacturing as well as fiber extraction
- Price of the end products, handicrafts, commissions required by retailers
- Cost structure
- Capital requirements
- Govt approvals and subsidies

Our network of machinery suppliers will assist you in setting up the unit.
